

**GB Blades** are created to tens of million hobby players all around the world. Here is the opinion of one of them. **The first date** with **GB Blades**. (The email from a hobby player from Feb 28, 2012):

„Dear GB Blade Family,

Congratulation to your products! I am **Szlekovics, Attila** (1967). I had the chance to try GB Classic Blade yesterday at the Table Tennis Club of Dunaharaszti.

**Incredible!** I am not a professional player and not even a good one, rather an oldish hobby player. I have several blades, but this blade I loved for the first sight. After I played with it, I have to state, that I will put aside all my other blades. While playing, I was changing the blades and with my former blade (which I am used to already) I simply was not that good than with GB.

**I need a Blade like this !!!**

With it I could give back at least 50% more balls. During the play I threw away my own blade and used again the GB one.

Incredible, that after one hour I could play much better with it. So much more, that it can be only psychologic.“
